

PRESS RELEASE 17 December 2010

D.E.S Announces Strategic Partnership

D.E.S Electrical Contractors UK Ltd, has entered into a strategic partnership agreement with CMB Fylde Engineering Ltd, to deliver combined electrical building services and mechanical solutions. The alliance will see the two local companies collaborating on a number of construction projects within the Fylde and North West region.

Recent projects delivered by each company include, Collis School, BskyB News Studios, Macdonald Hotel Manchester, Canon Sharples School, Woodfield School, Alexandra Hospital and The University of Surrey.

"We realised there was the potential to grow a substantial project portfolio by entering into a partnership with one another. We are in discussions with several construction companies for project work, and will structure the partnership arrangement on a project-specific basis. The alliance will hopefully place us in a position of strength for future construction projects within the Blackpool area". says Keith Lodge MD at CMB.

In terms of the overarching agreement, CMB Fylde Engineering and D.E.S will work together to execute projects especially within the educational sector, offering clients a full service, single point of contact and enhanced co-ordination in planning for the main contractor.

"Both companies are passionate about providing long-term employment opportunities to the community of Blackpool and we see this as an opportunity to create new jobs and apprenticeships and yet further our reputation as a key employer of local people" says Bill Dugdale Managing Director, D.E.S.
